ABOUT US

Green Line: Engineering the Future of Sustainable Glass Architecture

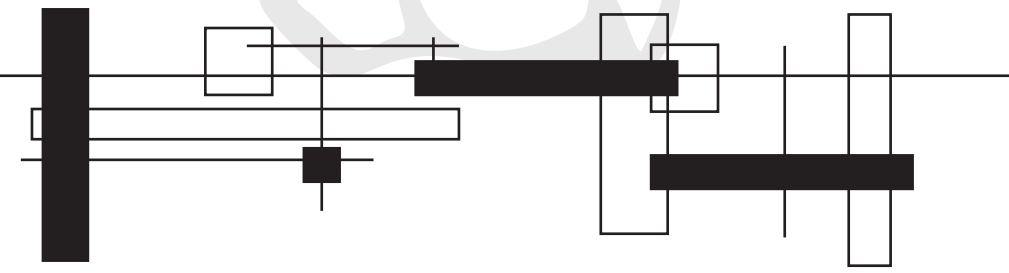

Founded in 1968 as Golden Factory, Green Line began its journey as a metal processing innovator, crafting industrial presses and production equipment. Today, it stands as a global leader in integrated glass facade systems, transforming skylines with cutting-edge solutions for airports, hospitals, luxury resorts, and commercial hubs.

The company's evolution accelerated in 2004 with the launch of its trademarked Green Line® Integrated Workflow (Reg. 977320). This milestone cemented its expertise in engineering bespoke glass systems, including the revolutionary Spider System for structural point-fixing, sleek Cladding Systems combining glass and stainless steel, and precision Track Systems for sliding or folding doors. Green Line's product ecosystem extends to fixed glass partitions, pool enclosures, and mobile handrails—all manufactured in-house using recyclable metals.

Driven by a commitment to sustainability, Green Line replaces environmentally harmful construction materials with eco-friendly glass and metal alloys. Its factory produces high-tolerance components like hinges, collars, and Soft Close mechanisms, ensuring seamless fusion of aesthetics and functionality.

Commercial Registration No.: 3210
Tax Identification No.: 412-990-725

VISION

Green Line Company is the world’s strongest developer of aluminum profiles. From 2024 to 2026, the company aims to develop in the field of aluminum profiles, including external and internal facades, doors and windows, with various uses, including sliding, hinged, or fixed, using modern and new methods.

These include “Slim Frame” profiles for greater clarity of vision for the glass, safe closing systems (Soft Close), and the introduction of moving mechanics via wheels and belts for ease of movement. This represents a new alternative to automation and replaces outdated methods in the use of aluminum sections.

All of this will be implemented through Green Line’s new metal and glass architecture system, built on a strong foundation of professional consultants, designers, technicians, and distinguished installation teams—led by an experienced management team.

We seek to expand this system to achieve our mission: to connect with customers and provide them with global metal and glass architecture technologies, deliver integrated glass solutions, promote the culture of glass architecture, and offer full access to information through Green Line branches worldwide.

We do not stop performing our mission successfully.

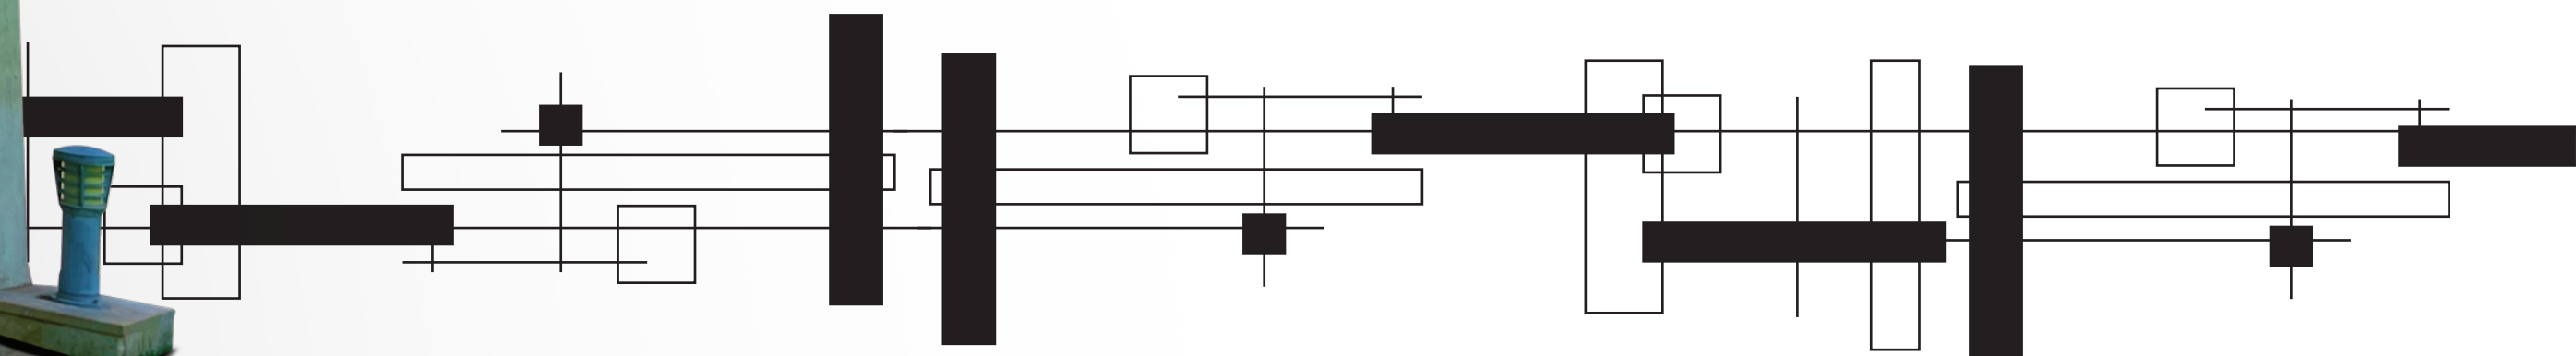

MISSION

Green Line's mission is to advance sustainable development by eradicating toxic building materials, spearheading R&D in aluminum-glass systems, and democratizing glass architecture knowledge through open-access resources. Every project—from concept to installation—embodies precision engineering and environmental stewardship.

"Towards integrated glass architecture... inspiring the world!"

PRODUCTS

Green Line stands as a leading innovator in the glass and glass accessories industry.

We offer a comprehensive range of products, including all types of glass façades, pergolas with glass roofs, sun-blocking shutters above pergolas, and elegant glass handrails.

Our expertise extends to curtain walls, shower enclosures, and glass claddings for floors, ceilings, and walls.

We specialize in frameless, slim frame, semi-frame, and traditional aluminum sections, ensuring flexibility and precision in every design.

Furthermore, we provide exceptional mechanisms and hardware systems that set new benchmarks in the global market for all kinds of doors, façades, and pergolas.

Below is a showcase of some of our standout products — though we take pride in excelling across every category we offer.

Green Line offers a wide selection of pergolas with exceptional design flexibility.

You can choose the perfect structure – whether natural wood for a warm, organic feel, sturdy metal for a contemporary and robust look, or sleek aluminum that blends lightness with elegance.

Each pergola can be seamlessly integrated with a variety of façade types – folding, sliding, or hinged – to provide maximum customization and harmony with the surrounding environment.

Pergolas are also equipped with a range of durable handles and fixing systems that ensure structural integrity and easy usability.

Creating an outdoor space that combines comfort, style, and top quality.

PERGOLA

Green Line offers a comprehensive range of facade systems for both indoor and outdoor applications, including sliding, multi-sliding, folding, hinged, and fixed glass panels.

These facades are available in frameless, semi-frame, and standard aluminum finishes, providing flexibility to match any design aesthetic or functional requirement.

Our systems are designed to ensure smooth, reliable operation and superior performance, with options to include toughened, printed, or frosted glass for added privacy and style.

We place a strong emphasis on aesthetics and functionality, integrating modern design with practical features to create stunning, high-quality facades.

Whether for residential, commercial, or hospitality spaces, Green Line facades offer the perfect balance of elegance, strength, and versatility.

FACADE

Green Line glass handrails provide both safety and style with toughened glass panels and high-quality stainless steel 304 brackets and accessories.

Available in multiple systems including glass spigot, standoff cups, stainless steel posts, and brackets, they offer design flexibility to suit any aesthetic and site-specific requirements.

The type of support system is selected based on the desired look and surrounding décor, ensuring that each project achieves both elegance and durability.

Handrails can be complemented with either wooden or stainless steel supports for added functionality and visual appeal, making them suitable for various residential, commercial, and public spaces.

HANDRAIL

Green Line's spider curtain wall system is designed to create stunning glass facades with minimal structural interruption.

The system features high-strength stainless steel spider fittings that firmly secure the glass panels, ensuring durability and sleek transparency.

It offers a modern architectural aesthetic and is suitable for both commercial and residential applications.

The spider curtain wall provides a minimalist look while maintaining excellent stability and safety, perfect for those seeking an impressive yet elegant glass façade.

CURTAIN WALL

Green Line offers complete shower cabins that seamlessly blend elegance, functionality, and safety.

Our shower cabins are available in a range of configurations: folding, sliding, hinged, and fixed panels. This flexibility ensures that each cabin can be perfectly tailored to the customer's needs, taking into consideration site measurements, space, and surrounding décor.

Each system can be fabricated in frameless or semi-frame designs, crafted from high-quality tempered glass for added durability and safety. The glass itself can be customized: clear for a sleek, modern look, frosted for privacy, or even printed or tinted to match your desired aesthetic.

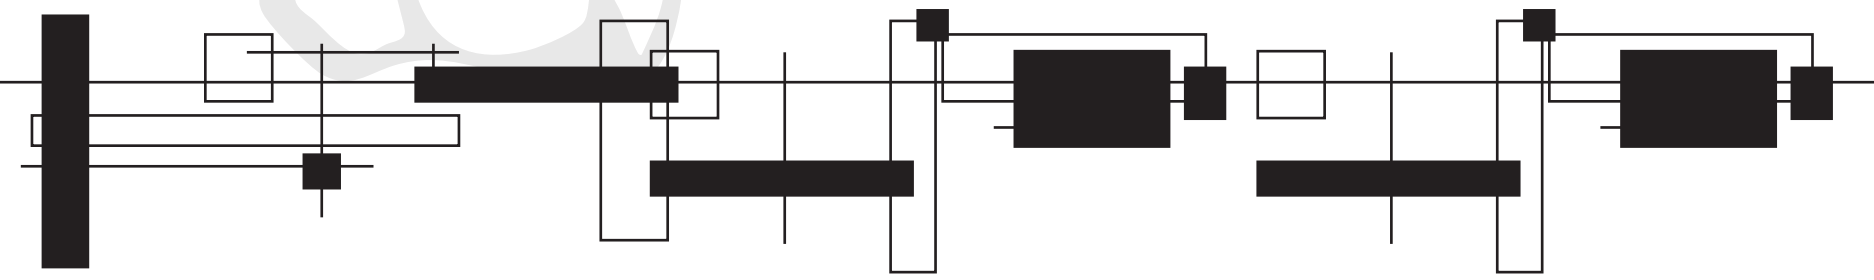

All mechanisms used in our cabins are sourced from the highest-quality systems in the global market, ensuring easy and smooth operation for everyday use.

Whether your shower cabin is corner-mounted or spans from wall to wall, Green Line's comprehensive approach and attention to detail guarantee a final product that's as practical as it is beautiful.

CABIN

QUALITY POLICY

Green Line Group of Companies for Glass and Metal Works, Integrated Solutions, and Decorations

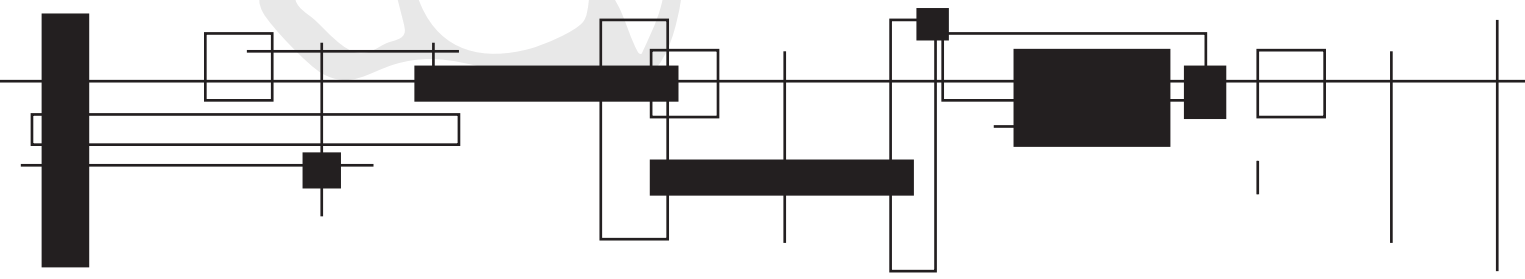

Green Line is recognized as a leading and advanced local company, fully capable of executing projects in the field of glass construction and integrated solutions. We specialize in all kinds of glass decorations, ensuring commitment to international standards and specifications that align with industry principles.

Our mission is to meet and exceed customer expectations by delivering exceptional quality in line with global standards. We adopt rigorous scientific and practical systems to ensure continuous progress, merging architecture with glass and metal seamlessly.

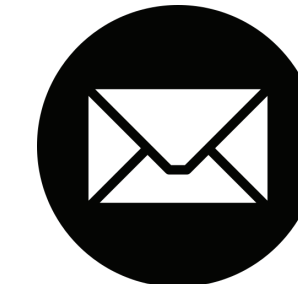

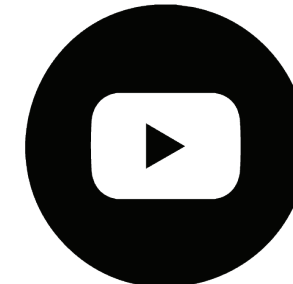

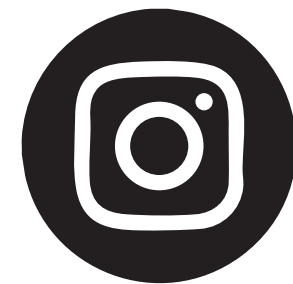

We adhere strictly to local and international standards, conducting thorough research and testing for every project. Our focus on utilizing modern equipment and advanced technologies guarantees the highest quality in every product we deliver.

Continuous improvement is our core value, achieved by constantly testing materials to ensure they meet our strict specifications and by investing in employee training. This empowers our team to perform their work with precision and fosters long-term, trust-based relationships with our clients through ongoing collaboration and communication—ensuring safety and quality at every stage.

CONTACT US

At Green Line, we make it easy for you to connect with our customer service team through various channels. Whether via social media, phone, or a personal visit, we're here to assist you. We also welcome you to explore our showroom to view our actual products and samples firsthand.
